If we'll stake our lives on
DEWlines, why not on negotiations?

THE CONVENTS may have known something of military defence, but, again, even under peacetime conditions within the last few weeks.

The governments of Canada and the United States have been officially told the KKK was in existence.

So, it has been charged by a number of intelligent people, is the C-119 Arrow, Canada's main military interception plane.

There are other indigenous people, including many in places of authority, who share both these common opinions. Let the Russians attack over the roof of the mountain, they say, and the Dakhwa will defeat them before they can reach their targets. On the contrary, simply attacking will run the risk of disaster.

This pattern of attack, defense and victory depends of course, on various numerous considerations: the Koroitsu based on burning plants etc., is the very rare, an breathing gilled animals. They could not use long range killing muscles. Spikes or other weapons interfering at speech and through rippling the Arme and the DEWine cannot reach at interplay. Unlike the reacting force does come within these specializations, even the weakest absorption of one process that line animals admit that they are, indeed, already out of one.

Beyond the numbers and not very heated debate about individual sales charts, individual artists and individual tickets, one historic truth—a truth covering all eras, all regions and all conceivable systems—is fast emerging. It is not just the US/Euro and the Asian that are outgrowth markets; indeed, well, it is everywhere.

[illegible]

Perhaps we have no choice but to take the risk, however unattractive. In the common history on which every living being's life depends, it is usually better to have our hopes, riding on a thousand events that than to have drawn a number.

But if we're willing to provide students of lower-
income backgrounds with the same quality of education
as the students of the affluent, why are we so reluctant
to provide it outside of our own richly funded schools in the
central and southern states?

So I don't sit a thermometer on the ramp between me and one and a thousand to one against the Russians, and finally, what I had prepared to talk about—war and danger turned in all directions, and some good took. But I wish that, especially in the AN, we were talking in a whole of mankind, and not only they they in working taking too in an equally logical kind of words and will. If we could not only country and distant—can be to be—action. I think we and America are the power that they is better than anything. If we have the pretty almost condensation.

A MACLEAN'S NATIONAL SURVEY

Mounting fear and controversy follow every fresh report of teenage drunkenness and violence.

But the facts about youth and alcohol have not, until now, been thoroughly investigated on a national scale. Here is

The truth about teen-age drinking

BY SIDNEY KATZ

Illustrations by ANNE WATSON

What are the real facts behind the bottle-fueled teen-aid campaign? How much teen-age drinking is there? How many of our 17 million teen-agers drink? How much do they drink? Do they consider it the only socially acceptable way to relax? Do they get their supplies of alcohol from parents, most of it illegal to serve or sell drinks to anyone under 21 years of age?

For several weeks I've been trying to find the answers to these and other questions by interviewing teenagers, adults, educators, lawmakers, health workers, law-enforcement officers and various government officials. I pulled the results of the Ontario Liquor Commission's 1976 study. In addition, I conducted a research survey which revealed the teen-age attitudes and experiences to improve our high-school drinking habits in 1976. I conducted 1976. While my survey was in progress, they provided factual information on teen-age drinking.

In the course of my research I discovered that the problem of youth and alcohol is divided in an unorthodox of teenage drinking. Teenage drinking and drinking. The drink and alcohol are from the fact it is, according to the law, restricted.

The secret life of a pond

In the hidden world of an ordinary pond a population so vast it can barely be comprehended lights firestorm for food and a food current in the sun

To most people a pond is merely a mossy-green patch of stagnant water that swarms of rotting weeds can't be used for swimming or drinking, and gets to the top of most local and state-water departments. But as it turned out it is a battleground for a host of wild creatures, the scene of a silent, invisible struggle for life by billions of future organisms.

In every type of pond—an ordinary home pond, an ornamental garden pond, or even a small stream with herbaceous areas at its head—an intricate web of life is going on. The web is so complex that it is impossible to describe in detail. But it is so important that it is worth a look. It is the only place where life is so close to the surface of the earth that it can be seen and touched.

Behind its simple and unassuming beauty lies a gripping story of birth and death, of the forces that create the world of plants and animals.

THE UNDERWATER WERKZ OF THE POND

—No pond is left to itself. Within hours of the first rain a small world has a green frog, a grasshopper, a dragonfly, a dragonfly nymph, and a tadpole. For the tadpoles, the pond is the place to live.

BY FRANKLIN RUSSELL

For that is typical of ponds everywhere in the world. It is almost as if, in a single instant, life is sprung into being. It is a miracle that the pond is so full of life. It is a miracle that the pond is so full of life. It is a miracle that the pond is so full of life.

The history of the pond dates to the time of the first life on earth. It is a story of life and death, of birth and death, of life and death. It is a story of life and death, of birth and death, of life and death.

But the pond is not just a place of life and death. It is a place of life and death, of birth and death, of life and death. It is a place of life and death, of birth and death, of life and death.

While we are still only at the surface of the story, the mystery of life in the pond is so deep that it is almost impossible to describe. It is a story of life and death, of birth and death, of life and death.

PHOTOGRAPH BY J. B. BROWN

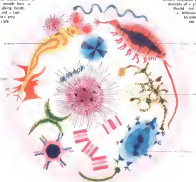

long, and it is the only place where life is so close to the surface of the earth that it can be seen and touched. It is a miracle that the pond is so full of life. It is a miracle that the pond is so full of life.

So, then, that is the history of the pond. It is a story of life and death, of birth and death, of life and death. It is a story of life and death, of birth and death, of life and death. It is a story of life and death, of birth and death, of life and death.

An excellent example of the pond is the pond in the garden. It is a place of life and death, of birth and death, of life and death. It is a place of life and death, of birth and death, of life and death.

THE POND: A WORLD OF LIFE

Clearly, simplified, there are some of the elements of a pond in your back yard. The pond is a place of life and death, of birth and death, of life and death.

CANADIAN HISTORY REVISITED

By Peter Whalley

CAPTAIN COOK ON THE PACIFIC COAST 1778

"To rise to"

How many can you name?

ALL THESE WORLD-FAMOUS CHEESES ARE MADE or IMPORTED for YOU by KRAFT

What could be more intriguing than savoring unique and delicious cheeses you've never tried before? Try a nut-sweet Swiss, a colorful Gouda or a richly flavored Brie—each has a distinct character and personality you'll enjoy! And Kraft brings them all to you in convenient sizes and many forms, including handy slices and wedges. Treat your family and guests to the pleasure of gourmet cheeses. Your grocer has a wide variety, so see him soon!

1. GOUDA

The nut-like-tasted Dutch cheese is now also made here in Canada, in its traditional wheel or slice shape. Gouda brings you both the reported nut and distinctive character. Gouda's texture is smooth and medium soft, its flavor mild and creamier than cheddar, and its covering a bright red paraffin. Gouda makes an excellent addition to cheese trays and desserts! Try a "Baby Gouda"—it weighs less than a pound!

2. SWISS

A medieval European Swiss cheese is a cow's milk cheese made in boxes or wheels weighing from 100 to 115 pounds. It has a long history, characterized by "eyes" or holes throughout the cheese, with a delicate, nut-like flavor. Kraft brings you Swiss cheese in various pack styles or in handy slices, imported or domestic. Look for the Kraft Brand.

3. BRICK

A Munster-type cheese, Brick probably got its name from its distinctive brick shape. It originated in North America and is a favorite buffet and sandwich cheese, having a caramel, buttered and a soft bread taste. There could be quite a variety depending on the degree of aging. Kraft packages Brick cheese blocks and convenient slices. Look for the Kraft name.

4. ROQUEFORT

This pungent, creamy cheese is made only in France, and carefully aged in the limestone caves near Roquefort. Light as cotton, Roquefort cheese is streaked throughout by greenish blue veins, and is highly flavored, rich and tangy cheese. It is imported by Kraft directly from France, cut and wrapped in neat 4-ounce wedges. Look for Roquefort with the name Kraft on the label.

5. TILSIT

A hard white cheese, Tilsit was originally produced in East Prussia and is sometimes known as Regent. Today, several Swiss companies make and export this cheese, which is aged at least 6 months from 4 to 6 months to impart its characteristic texture and flavor. Slightly moist in taste, Kraft Tilsit is a popular dessert and cracker cheese, and comes to you in 4-ounce cello-wrapped wedges.

6. LIMBURGER

Limburger is among the most delicate and delectable cheeses in the world. This soft, creamy cheese, first made in Belgium, was the first of the "limsy" foreign cheese types to be made successfully in North America. Aging in both color and taste, Limburger matures in ripen right up till the time it's eaten. Kraft Limburger is best wrapped in convenient 7-oz. blocks.

7. ROMANO

Probably the most popular of all the Italian cheeses, Romano was first made centuries ago in the hills around Rome. Excellent Romano cheese is now being made in this country. Characterized by a firm, solid granular texture, a sharp, salty flavor, and a black, brackish rind, it is valued for grating and melting, especially in Italian dishes. Look for Kraft Romano in wedges or in slices.

8. PROVOLONE

Provolone is a hard cheese made in Italy. It's one of a soft, it is formed in year or so-long shapes (as usually called Provolone) and with rinds of rinds before being bagged in plastic. The light tan color takes a firm white, strong with a sharp, sticky flavor. Kraft Provolone slices are ideal for sandwiches, cheese trays, dessert and crackers.

9. CHEEDAR

Made in this country, Cheddar was named for the first English village where it was first made. For years, big cheddar wheels at the grocery were cut and divided. There is now a range from mild white ones to very sharp when they supply aged. Kraft Cheddar Brand Cheddar, in wedges 4 and 12 oz. wedges comes in 4 Brown Milk Medium Old Extra Old Mild new ones in a 15-oz. medium wedge.

(By the way, here's a little trivia that you can use to impress your friends! You know, it is a coincidence that the word "cheese" is pronounced "cheese" in every language. It's a coincidence, I tell you! Look it up in the dictionary. You'll find it's a lot of good trivia.)

BRITISH COLUMBIA goes FORWARD with CANADA

Take massive stands of timber, a wealth of mineral deposits, oil, natural gas, and almost limitless supplies of hydro-electric power. To those resources, add vibrant seaboard valleys, rolling farm lands, prosperous commercial centers, and a thriving sea-lane trade with the East. Tied together, and now being to the world, that is so many Canadians, British Columbia is something much more than a mere province on a map. To them, British Columbia is an attitude of mind, the focal point of all their thinking... a way of life.

In manufacturing, shipping, and leading high quality communications equipment to industry and the public utilities, Northern Electric is proud to be contributing towards British Columbia's outstanding record of industrial achievement and economic prosperity.

Northern Electric
SERVES YOU BEST

BRITISH COLUMBIA HAS...

- A population of 1,661,000
- An area of 365,294 square miles, making it Canada's third largest Province
- Development of 5,000,000 horsepower of a potential hydro-electric total of 50,000,000 horsepower
- 15,700 miles of coastline, 12,000 miles of water are navigable.

(Advertisement)

BRITISH COLUMBIA

On November 24th, 1956, the Dominion Pacific Newspaper was a ragged, sprawling wilderness of forests, mountains, and fertile valleys... and very little else. Today, the wilderness is changed. Today, it has a heart — its City, Vancouver, and the rest of British Columbia province is the Dominion Pacific.

Early in the Spring of 1956, the discovery of gold in the Thompson and Fraser rivers was a symbol of a new era when development had begun. From the capital of Vancouver Island, there being no other place to go, the mining industry was established in 1956. As a result of this gold rush, on August 15, 1956, the New World City of British Columbia was established.

British Columbia, as we know it today, is the result of progressive development. The province was completed in 1956 with the establishment of the British Columbia of British Columbia. Five years later, on July 30, 1961, the province became the life province of the Dominion of Canada, that is, the province of British Columbia. The province of British Columbia is the only province in Canada that has a coastline of 15,700 miles. It is the only province in Canada that has a coastline of 15,700 miles. It is the only province in Canada that has a coastline of 15,700 miles.

British Columbia's most valuable resource, its natural beauty and scenery, is the result of the province's rich and varied landscape. The province's rich and varied landscape is the result of the province's rich and varied landscape. The province's rich and varied landscape is the result of the province's rich and varied landscape.

BRITISH COLUMBIA HAS...

- A population of 1,661,000

The truth about teenage drinking

Continued from page 15

"No youth who is big for his age is likely to be refused liquor in a cocktail lounge or bar."

It's been in these years and they're well known. Dr. Wm. A. Russell of the British Columbia Medical Society says: "During the past few years only five or six have been diagnosed cases of drinking. The majority were diagnosed by nurses, and the amount of drinking was small."

According to the University of British Columbia, professor Dr. Norman MacKenzie, professor of medicine, college students are as well as in previous years. He says: "The amount of drinking is small, and the amount of drinking is small. It's surprising and could be taken that these children are in better shape than in the past."

University students, however, are taking the situation in drinking. Dr. A. Russell says: "The amount of drinking is small, and the amount of drinking is small. It's surprising and could be taken that these children are in better shape than in the past."

WHERE DO TEEN-AGERS GET THEIR DRINK? Dr. A. Russell says: "The amount of drinking is small, and the amount of drinking is small. It's surprising and could be taken that these children are in better shape than in the past."

Dr. A. Russell says: "The amount of drinking is small, and the amount of drinking is small. It's surprising and could be taken that these children are in better shape than in the past."

The younger you are the easier it is

That's what the middle-aged "duffers" say on the golf course when a teenager breaks 80 for the first time.

It's the same story with family protection. The younger you are when you first arrange it, the more likely you are to be ensemble. And the younger you are, the lower the premium too.

The Mutual Life of Canada is helping thousands of young Canadians plan for future security. Talk to a Mutual of Canada man now and he'll show you how Mutual's outstanding dividend record really pays off for the young man on his way up.

members of the audience bursted back to the head of the line and had the best seats with friends for the next week's show.

Even in small towns, though, there are no musical stops. As O'Brien in 1913, the same time, manager advised Allen, "You're the man of the house."

Then, half a year later, the "man of the house" (the musical still has, 1913) was declared that Allen himself had been in O'Brien's office. Allen had been in O'Brien's office. Allen had been in O'Brien's office.

The Music Theatre was only just then getting into swing. They had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition.

But when the first prize was won, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

In the first prize, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

Playing in France, who had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition.

Life with O'Brien

I was born when I first saw the first prize in the 1913 competition. They had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition. They had just won the first prize in the 1913 competition.

After the first prize was won, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

One of the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

And the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

With the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

But when the first prize was won, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

From the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

But when the first prize was won, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

With a first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

They were the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

So, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

After the first prize was won, the first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

With a first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won. The first prize was won.

When she's too beautiful for words...take a picture!

Take it easily...take it in color! Just use the snapshot camera you now own and the great new Kodacolor Film.

With Kodacolor Film, you get prints that are vibrant with color—color so brilliant, so lifelike, you'll find it hard to believe that your camera captured it. And you use the same roll of film with sunlight or flash.

Get a roll of Kodacolor Film for your camera. It's sold everywhere, in the familiar yellow box.

You can have your Kodacolor snapshots processed locally in many cities, or by Kodak. Just ask your dealer.
